Sayed Islam Safin

I am web developer with a vast array of knowledge in many different front end and back end language,responsive frameworks, database and best code practice. My objective is simply to be the best web developer that I can be and to contribute to the technology industry all that I know and can do. I am dedicated to perfecting my craft by learning from more resources, remaining humble and continuously making strides to learn all that I can about development. My understanding of problem-solving and Research of Computer Vision and Artificial Intelligence are also skills that have and will continue to contribute to my overall success as a developer.
